The elevator pitch

At Yellowfin, we create simple, beautiful solutions for your complex data needs. Made for the decision maker, Yellowfin allows more people to see, understand and do more with their data through automation, data storytelling, collaboration, data discovery and stunning action-based dashboards.

01 Brand

Proposition

Why Yellowfin?

Yellowfin solves the complex data problems that sophisticated businesses face. It's the only enterprise, integrated and embeddable analytics platform that successfully combines action-based dashboards, automated discovery, data storytelling and collaboration that end users will find simple to use. This allows more people to see, understand and do more with their data.

Product description

The Yellowfin analytics platform solves the data complexity issues faced by modern business with a platform that is simple to use and beautiful to look at. Made for the decision maker, Yellowfin allows more people to see, understand and do more with their data by successfully combining automation, data storytelling, data discovery, collaboration and stunning action-based dashboards.

Positioning

Data complexity made beautifully simple.

Tagline

Beautifully Simple.

DATA COMPLEXITY MADE BEAUTIFULLY SIMPLE

Product

Positioning

Each component of the Yellowfin platform has a Go To Market (GTM) positioning that states the core proposition around that component.

Dashboards
Yellowfin Canvas
Do more with Yellowfin dashboards

Guided Natural Language Query (NLQ)
An easy way for anyone to ask the hard questions

Embedded Analytics
Deliver more with less code

Self-service BI
Explore and visualize your data

Data Storytelling
Yellowfin Story and Present
Yellowfin tells you a different story

Automated Business Monitoring
Yellowfin Signals
Insights that find you

Yellowfin is committed to greater investment in STEM education with a particular focus on programs that encourage more young women to choose data analytics and data science as a career.

02 Logo

Beautifully Simple

We believe people make better decisions and organizations are far more successful when data is at the heart of their decision making.

So, at Yellowfin we strive to develop products that turn complex data into useful answers and allow everyone to see the truth.

As simplicity is the height of sophistication, we ruthlessly resist the temptation to complicate.

When we keep things simple, we create greater understanding.

Yellowfin takes the complex and makes it simple.

Beautifully simple.

Beautifully Simple

The logo

Symbol

Whilst the Yellowfin symbol is obviously a stylized version of the letter Y and is used to replace the “Y” in Yellowfin, its inspiration is drawn from a more organic form.

The Yellowfin symbol was drawn from the tail of a fish as it arches to pivot in new, changing directions.

This sums up the spirit of Yellowfin — tuned into its surroundings, agile and quick to identify a problem to solve.

The logo

What changed?

There has been a number of subtle adjustments made to the Yellowfin logo to improve its readability and reproduction consistency. Please ensure you are using the correct version of the Yellowfin logo.

Icon

The icon was simplified and the gradients and outline were removed and replaced with block colors. This makes the logo clearer and easier to reproduce on non-digital applications such as signage

Wordmark

The grey type was updated to match existing Yellowfin Stone Grey. The darker orange outline on the Yellow 'fin' has been removed to improve legibility and reproduction

Original
Do not use

Updated

The logo

Layout

This is our logo. There are three elements that make up the complete logo and these can also be used as separate items. The full logo is made up of our symbol, wordmark and tagline.

Do not alter the layout of the symbol, wordmark and tagline.

The logo

Variations

The logo can be used in both positive and reversed situations with variations for full color and mono.

Mono use of the logo is either Stone Gray or Snow White depending on the background color.

Full color positive

Mono positive

Do not change the colors of the Yellowfin logo or represent the logo in different colors.

Full color reversed

Mono reversed

The logo

On backgrounds

When reversing the Yellowfin logo out of an image or colored background except gray, please use the white mono reversed logo. Ensure that there is adequate contrast between logo and image if reversing.

Mono reversed

Do not use the full color Yellowfin logo when reversing out of an image or background color.

Mono reversed

The logo

Clearance

Like fish, the logo needs some air to breathe. Please keep any other items including partner logos, graphic elements and artwork edges outside of the designated clearspace. To work at any scale or size, we suggest the minimum clearance is defined by the use of the letter 'w' from the Yellowfin typography. It's a minimum requirement, so when in doubt, more space is always better.

03 Colors

The Colors

Primary

The Yellowfin primary palette consists of three highlight colors and two neutral tones.

The Colors

Primary usage

Use the Yellowfin primary palette in the following approximate proportions.

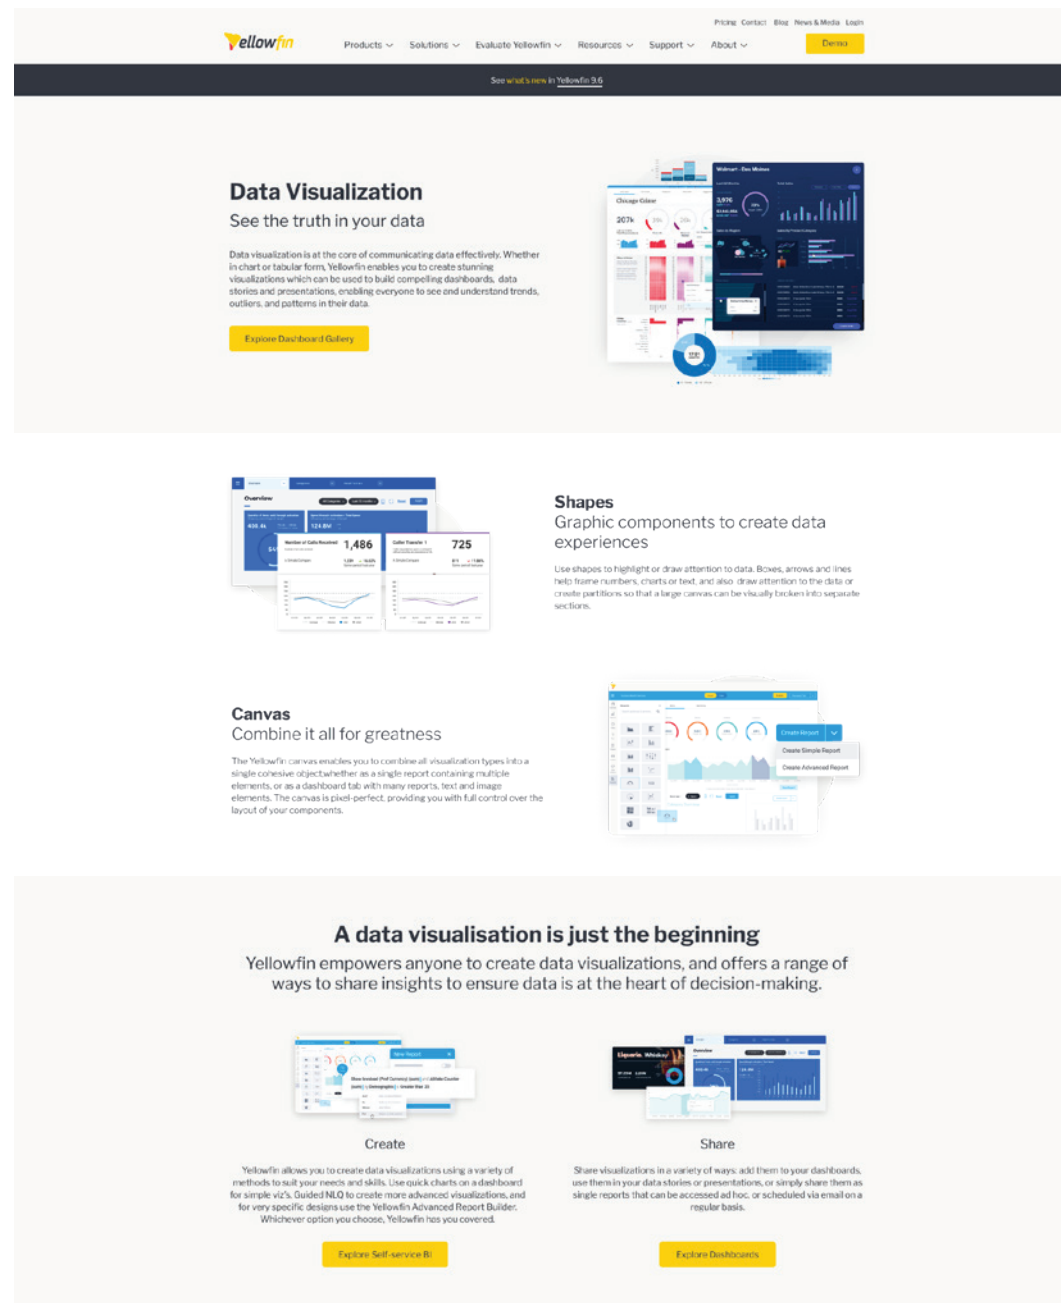

The Colors

Website usage

The Yellowfin website uses a combination of primary colors. Sun Cream #F8F6F4 is used to break out sections in conjunction with white #FFFFFF

Stone Gray #333740 is often used for boxed content such as banners.

Yellowfin Yellow #FED109 is used primarily as a highlight color on buttons.

The Colors

Grey

The Yellowfin grey palette is used mainly for digital purposes including neutral components in charts and dashboards.

The Colors

Default charts

Default Yellowfin charts use the chart colors in a predefined order. This order is to ensure that visibility between information is consistently clear.

The Colors

Dashboards

When creating dashboards, Yellowfin chart colors will help guide users to data they need to see.

Use color to tell a story and be consistent across metrics and dashboards.

The Colors

Usage

For supporting graphic elements like charts, images and icons, Yellowfin grays can be combined with colors from the primary and chart color palettes.

Aggravated crime

Crime year to date

Compared to this time last year

15k **15k**
Aggravated crimes this year This time last year

Crime variation year to date

Compared to this time last year

Simplicity is the height of sophistication
So, we ruthlessly resist the temptation to complicate

BEAUTIFULLY SIMPLE
美しく、シンプルに

The Future of Data Storytelling: how narrative and automation will redefine the next decade of analytics

25% of business leaders view data storytelling as one of the most important, emerging capabilities they want to have when selecting a new analytics solution.

Data Storytelling: The Power of Using Narrative to Influence and Engage the Business

Finding your data story

Do you want insights uncovered in your data to be remembered, and acted upon? Before adopting analytics solutions with a storytelling component, the next step is to ensure they are made memorable. Here are a few key tips:

- What does the story tell?
- Is it an attempt at answering the question you want?
- Is it a lesson in what not to do?
- Is it a fact that not every stakeholder will know, but one that people should know?

The data might be the most of your data story. It needs to be told in a way that your audience can relate to in a memorable way. The narrative you build around the insight could be the most important part of the story. It's not just the numbers, it's the story that makes the data meaningful and actionable. Consider the context, the impact, and the future. The narrative and the data, when combined, can be a powerful tool for influencing and engaging the business.

"What can't be automated is the addition of context not in the data; this is where humans will always play a role."

"There is no such thing as information overload. There is only bad design"

Edward Tufte

Data Storytelling:
The Power of Using Narrative to Influence and Engage the Business

What is the Embedded Analytics Maturity Curve?

The Embedded Analytics Maturity Curve highlights the value of business intelligence (BI) and analytics to your team and the commitment of ongoing development effort through the five stages of the maturity curve. The maturity curve is a model of your current and target capabilities.

The curve also serves as a tool for understanding what specific capabilities to build within your product by comparing what your current analytics capability data value flow has reached and compared to the analytics and future options have the at each level of maturity.

1. Data is available
2. Data is accessible
3. Data is actionable
4. Data is integrated
5. Data is embedded

Yellowfin

The Future of Data Storytelling

How narrative and automation will define the next decade of analytics

The influence of the modern data story

Today, how analytics users share and understand their data is shifting from static dashboards to data-led narratives, with data storytelling providing new ways for extracting context, or insight, not present in the data itself.

A data story helps less data literate people interpret what is in a dataset, but it's also a helpful vehicle for subject matter experts to add further context that is not present in the data, making the consumption of important happenings in the business easier for everyone. And with the rise of other innovations, such as automation, data stories are set to be embraced by the masses.

Typography

Combinations

When possible, present section dividers, quotes and pullout text on a darker background to give more emphasis.

Typography

Platform font

The master font used across the Yellowfin product platform is Roboto.

This is paired with Libre Franklin which is used for published text components.

Roboto has a dual nature. It has a mechanical skeleton and the forms are largely geometric. At the same time, the font features friendly and open curves. While some grotesks distort their letterforms to force a rigid rhythm, Roboto doesn't compromise, allowing letters to settle into their natural width. This makes for a more natural reading rhythm more commonly found in humanist and serif types.

Roboto is licensed under the Open Font License and is available as a Google font to use across all digital and print formats.

07 Partners

Partners

Key graphic

A graphic has been created to represent the Yellowfin Partner network. Made of our shapes, the graphic represents a stylized “+” to convey the value Yellowfin brings to our partners and their customers.

Partners

Key graphic use

When introducing or announcing a Yellowfin partner relationship, the partner logo can be contained within the key graphic shape and used across social, video, web and print applications.

This can be done in positive or reverse depending on the application.

The logo

Partner lockup

When using the Yellowfin logo in conjunction with a partner logo, a number of layouts are possible. Please choose the layout that best suits your individual need or application. We suggest that the symbol + wordmark version be used unless otherwise requested.

Please ensure that the minimum space (2 x w) guidelines specified are adhered to ensure both Yellowfin and partner brands retain their integrity.

An optional line divider device may be used to 'hold' the individual brands together and form a more defined lockup.

Certifications

Partner Badges

A set of Partner Badges have been developed allowing a way for Yellowfin partners to display their level of partnership across their own assets.

A positive and reverse set has been created to suit the intended application.

Please choose the version that ensures maximum legibility.

Certifications

Training badges

A set of training badges has been created to be used to display partner and end user Yellowfin certifications.

The badges have been created using the Yellowfin shapes and colors.
